# **ASP.NET: Project Overview**

# Ravi Punar (1MY19MCA13)

# o **ABSTRACT**

This project aims at creation of a secure Internet banking system. This will be accessible to all customers who have a valid User Id and Password. This is an approach to provide an opportunity to the customers to have some important transactions to be done from where they are at present without moving to bank. In this project we are going to deal the existing facts in the bank i.e.; the transactions which takes place between customer and bank. We provide a real time environment for the existing system in the bank. We deal in the method transaction in the bank can be made faster and easier that is our project is an internet based computerized approach towards banking.

#### Introduction

The Project 'Online Banking – Suncity Bank' provides comprehensive electronic fund transfer and payment solutions that enable thousands of Citizens, Financial Institutions and hundreds of businesses the convenience of receiving and transferring their funds

online. It's fast, easy and puts you in complete control – you decide who to transfer funds, checking of the account details. Receive and pay all your paper bills at one site – at your bank, credit union. Plus, you can enhance the convenience of transferring funds online by receiving your bills electronically, checking statuses of accounts and viewing the statements can possible with this system. You can do this from one secure online location, in just a few minutes. Internet-Banking system provides the greater opportunity to interact with Account holder. But in regular system there are no more interactions with an account holder or trustee. Authorities of Internet -Banking system can Provides the greater knowledge on Internet -Banking and they can effectively Explain in broader sense.

- Bootstrap
- HTML
- Javascript
- CSS

### Expected Result

The Expected Result of my project will be to have a safe and secure Online Banking transaction and is a simulation of real time banking application which will help understand the banking sector vastly. With the help of several databases and front end and back end services the project will be completed.

By the end of this project I will be able to have good amount of knowledge with respect to ASP.net with C# which will help me in my career opportunities.
